

## **Trade fair ALGERIA INFRASTRUCTURE Know-how about transport and logistics for Algeria**

**Munich/Algiers, 12 November 2018 – Algeria is investing strongly in the extension and improvement of its transport infrastructure while relying on the support of partners from abroad. The trade fair ALGERIA INFRASTRUCTURE is a business platform to bring together international professionals from the whole transport sector with Algerian decision makers. The next event takes place in Algiers from 28 to 30 January 2019.**

ALGERIA INFRASTRUCTURE covers all four sectors of the transport industry: rail, air, road and marine transport. Over the past two decades Algeria has increased its public investments for the public works and transport sector up to 135 billion US dollars. Several major projects have been planned or already initiated.

Thus, the airports of Algiers and Oran receive new terminals while at the same time the country's air transport fleet will be modernized and extended. To promote the export of Algerian goods such as cement, iron or agricultural products the sea ports are expanded whose number has increased from 28 to 48 since 1999. The Algerian railway system will also grow by 2,000 km until 2022 to be able to transport more passengers and goods. Moreover, Algiers extends its metro system which has lately added twelve new metro trains.

Simultaneously to the trade fair which has its sixth edition in 2019, professionals will meet at the first international forum on infrastructure in public works and transport to discuss current issues and challenges related to the transport sector. At the same time with ALGERIA INFRASTRUCTURE the International Exhibition of Road Prevention and Safety (RS Expo) and the International Exhibition for Products and Services for Mines and Quarries MICA take place.

International partner of ALGERIA INFRASTRUCTURE is IMAG GmbH, a subsidiary of Messe München. For more information and application materials please visit [www.imag.de/ai](http://www.imag.de/ai)
