Your key to the promising Iranian market

The 15th Iran International Water & Wastewater Exhibition is the biggest annual and commercial event in Iran, with the presence of a large number of domestic and foreign companies in this field.

In 2019 an official supported German pavilion will be presented by the Federal Ministry of Economic Affairs and Energy (BMWi) in cooperation with the Association of the German Trade Fair Industry (AUMA). The German Society for Trenchless Technology e.V. (GSTT) as well as the German Engineering Federation (VDMA) are strongly supporting the event.

Iran's Energy Ministry has released a list with over 150 projects regarding the construction of water treatment plants, sewage treatment plants as well as water and wastewater networks. WATEX is an excellent platform to refresh or establish contacts to potential business partners as well as local representatives and importers.

In 2018, 244 companies from 12 countries presented their latest innovations to more than 28,000 visitors.

Product range (not limited)

Water Technology	Technical & consulting services
Water Bottle Companies	Contracting & projects execution
Irrigation System	Laboratory materials & equipment
Agricultural & Horticultural Equipment	Training & researching instrumentation
Pipelining & Coating	Water saving equipment
Drilling & construction equipment	Dam & Hydropower construction equipment & services
Pump & mechanical systems	Water distributions & transmission equipment
Water & waste water treatment equipment & materials	Research and development
Chlorination System	
Pipes & fittings
