Website	<a href="http://www.mica-dz.com">www.mica-dz.com</a>

**Review on a successful presentation to the Algerian market**

Symbiose-Communication-Environnement organized the 3rd edition of the International Mining Industry and Quarrying Exhibition "MICA 2019" in partnership with IMAG. This event brought together decision-makers and operators of the sector to support and encourage the development of the mining industry. The International Mining Industry and Quarrying Exhibition is deemed a major event for professionals in Algeria's mining sector, providing an opportunity for experience sharing. More than 25 exhibitors and 2500 professional visitors attended the three-day event.

The 2019 edition hosted also the 3rd forum on mines and quarries. The major topics of this conference were:

- Effects of blasting around underground excavations
- Recovery and integrated management of mining wastes:  
 Keys to success in mining site rehabilitation
- Impact of drilling and firing work on the environment and the immediate vicinity of a mine
- Round table on the destruction of rock mass upon blasting of explosive agent

The government has shown willingness to revive the sector of Mines and Quarries. This willingness is motivated by the rich mineral wealth of iron whose geological reserves are currently close to 3 billion tons. The phosphate deposits are estimated at 2 billion tons, placing Algeria among the most important fertilizer producing countries in the Mediterranean basin.

**The 4<sup>th</sup> edition of MICA will take place next year, from  
 January 26 – 28, 2021**
